EDUCATION

CPE Lyon – Graduate School of Engineering Villeurbanne, France
Engineering Degree in Cybersecurity & Computer Science (CTI-accredited) *Sept 2025 – Aug 2028*

- Excellence program combining software engineering, cyberdefense and network architecture
- Coursework: Network Architecture, Operating Systems, Cyberdefense, Python, C, Java, PHP
- Academic skills: data security, DevOps culture, cloud computing, network and systems administration
- Hands-on projects: penetration testing, incident response, secure application development

ORT Lyon – Advanced Technician's Certificate Lyon, France
Cybersecurity, IT & Networks, Electronics – Option A: IT & Networks *Sept 2023 – Aug 2025*

- Intensive program covering network management, cybersecurity and embedded electronics
- Deployment, maintenance and securing of IT infrastructures and industrial systems

EXPERIENCE

Orange Business France
Client Solution Architect (Network Engineer Architect), Work-Study *Sept 2026 – Aug 2028*

- Design and implement routing solutions (BGP) for the networks of large enterprise clients
- Architect and deploy SD-WAN solutions, from needs analysis to technical proposals
- Manage the presentation lab used to demonstrate network solutions to clients
- Alternate one week at school and one week in the company, applying CPE Lyon coursework to real client projects

Universidad Nacional del Sur (UNS) Bahía Blanca, Argentina
Research Intern – Cloud Architecture & Cybersecurity *June – Aug 2026*

- **Cloud governance:** developed a security policy framework for hybrid (public/private) cloud use in government settings
- **Data sovereignty:** defined compliance frameworks to guarantee the isolation and security of critical state infrastructures
- **AI security:** analyzed attack vectors and designed trust architectures for integrating LLMs into public administration

Hospices Civils de Lyon (HCL) Lyon, France
N2/N3 Support Intern *June – Aug 2024*

- Collaborated within a development team to design and test features on a React web application
- Fixed front-end bugs and optimized UI responsiveness on mobile and desktop
- Managed versioning through a remote repository and took part in daily stand-ups in an Agile/Scrum environment

McDonald's France
Crew Member – Part-Time Job During Studies *Jul–Aug & Oct–Dec 2025*

PROJECTS & AWARDS

IAThon IBM x EDF – 1st Place March 19, 2026

- Designed and deployed autonomous AI agents to solve specific business challenges for EDF
- Used IBM's BOB IDE in early access to optimize the development cycle
- Built custom Python tools enabling agents to interact with external systems

WocsHack 2026 – Educational Bug Bounty – 3rd Place March 2026

- With two CPE Lyon classmates, audited and pentested an online learning platform (ethical, educational)

Roverba – Project Lead, Automated VM Deployment Platform Lyon, France

- Led and coordinated a team of 5 developers building a web application that automates VM deployment
- Developed the PHP back-end configuring VMs with SSH and RDP access; set up a Git workflow for task tracking
- Designed a secure authentication system and containerized environments, reducing inter-VM risks by 95%
- Cut manual deployment time by 70% and improved infrastructure scalability

Personal Website (Portfolio) – Developer

- Built a responsive React website showcasing projects and certifications; improved accessibility and load time

SKILLS, CERTIFICATIONS & INTERESTS

Development & Scripting: Python, C, Java, Bash, PHP, JavaScript, SQL
Systems & Networks: AD/DS, DHCP/DNS, Cisco, Linux, network security; Git, virtualization
Languages: French (native), English (C1), German (B2)
Certifications: Cisco – Introduction to Cybersecurity; Red Hat System Administration I and II (RH134); Driver's License (Category B)
Interests: Hackathons, entrepreneurship, agentic AI, volleyball, cinema
